Profile

Software Engineer and IT Consultant specializing in backend systems that do not break under pressure and architectures that drive tangible business autonomy.
With nearly 2 years of hands-on experience, I focus on multi-tenant AI orchestration, Hybrid Headless architectures, and secure B2B integrations.
Driven by precision engineering and clean code principles, I design resilient infrastructures that seamlessly bridge complex business logic with modern technological standards.

Professional Experience

- Jan. 2026 – Present
- Software Engineer (AI & Cloud), Nortis Studio, Contract**
Remote
 - Architected and developed Magma, an AI-oriented B2B SaaS platform utilizing FastAPI, Node.js, and n8n for autonomous workflows.
 - Designed and integrated enterprise-grade LLM and RAG pipelines utilizing pgvector for optimized semantic search and data retrieval.
 - Managed PostgreSQL databases with Row-Level Security (RLS) to ensure strict data isolation in a multi-tenant backend infrastructure.
- Nov. 2025 – Present
- Full Stack Developer, Chamiong, Contract**
Remote
 - Designed and shipped a high-performance web application utilizing modern frontend technologies (React, Next.js 16, TypeScript).
 - Built resilient REST APIs and JSON-RPC connectors to decouple and sync complex business data with an Odoo ERP backend.
 - Collaborated across frontend and backend environments, ensuring clean, testable, and highly maintainable code.
- Jul. – Aug. 2025
- Software Developer Intern, General Secretariat of the Government, Internship**
On-site
 - Contributed to the deployment of complex enterprise software (Odoo 17) and developed custom Python modules for workflow automation.
 - Participated in technical discussions, system design modeling (BPMN), and continuous improvement of operational processes.

Technical Skills

Backend	Node.js · Python (FastAPI, Django) · Java / Spring Boot · REST APIs · Laravel
Frontend	React · Next.js · TypeScript · JavaScript · Tailwind CSS · Angular
Data & Cloud	PostgreSQL (RLS, pgvector) · SQL · Redis · AWS (certified) · Docker
Architecture	System Design · n8n / Workflow Automation · LLM/RAG Pipelines · CI/CD

Education & Certifications

- 2022 – 2027
- Engineering Degree: Software Engineering & Digital Systems, EMSI Rabat**
Comprehensive curriculum focusing on software architecture, web development, cloud computing, and digital systems.
- Certifications
- AWS Cloud Technical Essentials · Meta React Native · HarvardX CS50 · IBM Python · IBM Node.js/Express
- Languages
- English (*Professional*) · French (*Professional*) · Arabic (*Native*)
