Profile

Software Engineer building backend and enterprise platforms across cloud, ERP and applied AI. **Hands-on experience across a multinational IT services company, a Belgian technology studio, national B2B industry and the public sector**, with systems used in production. Work spans business requirements, architecture decisions, APIs, data and integration through deployment and evolution of reliable software platforms.

Professional Experience

- Jan. 2026 – Present **Software Engineer, AI & Cloud, Nortis Studio, Contract** · Belgium · Remote
- Developed the core of Magma, an AI-driven B2B SaaS platform using Python/FastAPI, Node.js and n8n to orchestrate business workflows, services and AI agents.
 - Designed a multi-tenant PostgreSQL architecture using Row-Level Security and built LLM/RAG pipelines with pgvector under GDPR and European cloud constraints.
- Nov. 2025 – Present **Full Stack Software Engineer, ERP & Headless Architecture, Chamiong, Contract** · Rabat, Morocco · Remote
- Designed and deployed a hybrid headless architecture around Odoo 17, Next.js 16 and Sanity CMS for a national B2B industrial group.
 - Built resilient JSON-RPC connectors and an API adaptation layer decoupling the customer-facing platform from the ERP, with FR/EN/AR localization and migration without disruption to critical services.
- Jul. 2026 – Sep. 2026 **Engineering Intern, Business Intelligence & Business Applications, DXC Technology Morocco, Internship** · Technopolis, Salé · Hybrid
- Designed and delivered a skills management and reporting solution for Insurance RUN teams, from raw data to a management decision-support system.
 - Took over maintenance and evolution of production reporting systems through reverse engineering, root-cause analysis, issue resolution and scaling of existing modules.
- Jul. – Aug. 2025 **ERP Developer Intern, General Secretariat of the Government, Internship** · Rabat, Morocco · Public Sector
- Contributed to an Odoo 17 deployment and developed Python modules supporting MRP, inventory, sales, accounting and HR workflows.
 - Conducted gap analysis, technical specifications, BPMN modeling, RBAC design and operational documentation.

Selected Project

Previzma Java 17 · Spring Boot · Angular · PostgreSQL · REST · Spring Security : B2B platform built around a Spring Boot backend with REST APIs, PostgreSQL/JPA persistence, JWT authentication and RBAC, with a decoupled architecture integrating an independent ML service.

Technical Skills

Backend & APIs **Java / Spring Boot** · Python (FastAPI, Django) · Node.js · C# (ASP.NET Core) · REST APIs
Frontend React / Next.js · TypeScript · Angular · Tailwind CSS · Sanity CMS
Data & ERP PostgreSQL (JPA, RLS) · SQL Server · Oracle · Odoo 17 · Power BI / DAX · Dataverse
Cloud & DevOps AWS · Docker · CI/CD · Git / GitHub · Linux
Architecture & AI Decoupled Architectures · Multi-tenant Systems · API Design · REST / JSON-RPC · RBAC · LLM/RAG · AI Agents · n8n · pgvector

Education & Certifications

2022 – 2027 **Engineering Degree in Digital Development & Information Systems, EMSI Rabat**, Rabat, Morocco

Certifications **Oracle Certified Professional: Java SE 17 Developer** · AWS Cloud Technical Essentials · Google Agile Project Management · HarvardX CS50 & SQL · Meta React & React Native
