## Profile

Software Engineer & IT Consultant building backend systems, enterprise applications and integration layers across ERP, cloud and applied AI. **Experience across a multinational IT services company, a Belgian technology studio, national B2B industry and the public sector**, with software and business applications used in real operational environments. Work spans business requirements, architecture, APIs, data flows and systems integration through deployment, production support and continuous evolution.

## Professional Experience

- Jan. 2026 – Present **Software Engineer, AI & Cloud, Nortis Studio, Contract** · Belgium · Remote
- Developed the core of Magma, a multi-tenant B2B SaaS platform using Python/FastAPI, Node.js, PostgreSQL and n8n for business workflows, backend services and AI orchestration.
  - Designed PostgreSQL Row-Level Security, tenant isolation and LLM/RAG pipelines with pgvector under security, GDPR and European cloud constraints.
- Nov. 2025 – Present **Full Stack Software Engineer, ERP & Headless Integration, Chamiong, Contract** · Rabat · Remote
- Designed and deployed a hybrid headless architecture around Odoo 17, Next.js 16 and Sanity CMS for a national B2B industrial company.
  - Built resilient JSON-RPC connectors and an API adaptation layer decoupling the customer-facing platform from the ERP while preserving operational business flows.
- Jul. – Sep. 2026 **Engineering Intern, BI & Business Applications, DXC Technology Morocco, Internship** · Rabat
- Designed and delivered a competency-management and reporting solution for Insurance RUN teams, from operational data and business rules to management decision support.
  - Maintained and evolved production reporting systems through reverse engineering, data-quality analysis, root-cause diagnosis, issue resolution and documentation.
- Jul. – Aug. 2025 **ERP Developer Intern, General Secretariat of the Government, Internship** · Rabat
- Odoo 17 implementation across sales, purchasing, inventory, manufacturing, accounting and HR.
  - Conducted gap analysis, BPMN modelling, functional/technical specifications, RBAC and documentation.

## Selected Engineering Project

**Previzma** Public B2B sales-intelligence platform built with **Java 21, Spring Boot 3.5, Angular 22, PostgreSQL and Python/FastAPI**. Modular Spring business backend with REST, JPA, Spring Security, JWT/RBAC and tenant-aware access, integrated over HTTP/JSON with an independent stateless ML service for forecasting, simulations, backtesting and model evaluation.

## Technical Skills

|                      |                                                                                                                                           |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Backend & APIs       | <b>Java / Spring Boot</b> · Python/FastAPI · Node.js/Express · C#/ASP.NET Core · PHP/Laravel · REST APIs                                  |
| ERP & Business       | <b>Odoo 17</b> · Business Process Analysis · BPMN · Gap Analysis · Functional/Technical Specifications · ERP Integration · Power Platform |
| Frontend             | Angular · React · Next.js · TypeScript · Sanity CMS                                                                                       |
| Data & Integration   | PostgreSQL · SQL Server · Oracle · MySQL · Redis · pgvector · JPA · REST · JSON-RPC · Multi-tenant Data Models                            |
| Cloud & Architecture | AWS · Docker · Git/GitHub · GitHub Actions · CI/CD · Linux · Systems Integration · API Boundaries · RBAC · LLM/RAG · n8n                  |

## Education & Certifications

2022 – 2027 **Engineering Degree in Computer Science & Networks, EMSI Rabat**  
Specialization in Digital Development & Information Systems

Certifications **Oracle Certified Professional: Java SE 17 Developer** · AWS Cloud Technical Essentials · HarvardX CS50 & SQL · Google Agile Project Management
